## **Industrial Automation**

We can automate industry any size to increase production. We offer PLC's, DCS and SCADA solutions.

## **Home Automation**

Allows people to use voice or mobile phones to switch on or off lights, fridges, air-conditioning, generators whatever gadget in your house to switch on or off.

Controlling your gadgets wherever you are in the world is an exciting experience. There is no distance limit.

## **Solar systems**

The technology for solar power and battery storage has reached a stage where the cost and capability will deliver power to all within a generation. Twenty-five years from now it will be difficult to find anyone who does not have access to power.

In these early stages where the industry is still growing, we are providing solar solutions from designing, installations repairs and maintenance from residential to farm size.

## **Electrical designing**

Electrical design is one of the keys driving the technological advances enjoyed throughout the global society. Design and innovation are an ongoing program, and our team specializes in more than one area of electrical design.

## **Expertise**

Our team of Engineers, Technicians, licensed and certified electricians have the expertise and experience to handle any electrical project, no matter how big or small. We use the latest tools and techniques to ensure that all work is completed safely and efficiently. We have experienced technicians with a demonstrated history of working in high tech industries such as VW, Ford Engine plant, Coca-cola and many more. The

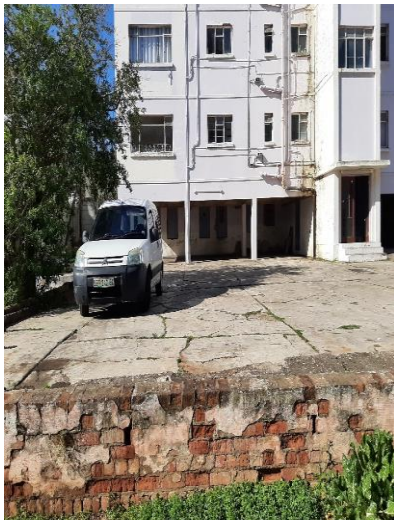

team can tackle any project in electrical engineering using key strategies which include:

- Preparing Cost and Labour Estimates
- Designing Electrical Systems
- Managing Electrical Contractors
- Resolving Electrical Problems
- Conducting System Tests
